WORK EXPERIENCE

PALANTIR (DATA & AI PLATFORM) | DEPLOYMENT STRATEGIST | [palantir.com](#)

Nov 2023 – Present | Canmore, AB

Built an automotive quality manager, railroad traffic analyzer & oil pipeline scheduler, totaling \$2M in annual licenses & \$2.5M in services.

VALIDERE (EMISSIONS MANAGEMENT) | PRODUCT MANAGER | [validere.com](#)

Jan 2021 – Aug 2022 | Toronto, ON & Calgary, AB

Managed roadmap and delivery of new features for enterprise software for clients paying \$100k to \$2M per year, improving user satisfaction and engagement. Rolled out standard Product Management processes for discovery, documentation & analytics.

CANVASS ANALYTICS (MACHINE LEARNING) | PRODUCT MANAGER | [canvass.io](#)

Jan 2019 – Dec 2020 | Toronto, ON

As the first product hire, led product overhaul spanning requirements gathering, vision & comms, and discovery & design. Grew data uploads by 13% and model usage by 21% month-over-month.

UNSIST (DATA VENDOR) | CO-FOUNDER & CEO | [NEXTAI](#) | [CDL](#) | [unsist.com](#)

Feb 2017 – Jul 2018 | Toronto, ON and Calgary, AB

Data science startup that predicts capital costs for Oil & Gas projects. Completed data projects for 3 clients (company sizes \$10M-\$1B), and developed 2 SaaS products (a regulatory report scraper & parser; a competitive benchmarker).

PETRORECRUIT (JOB BOARD) | CO-FOUNDER & UX

May 2015 – Feb 2017 | Calgary, AB

Scoped requirements and co-built initial prototype with the first technical hire in under 1 month. Grew job postings from 0 to 100k through in-app postings and data mining external boards.

GREYADV (WEB AGENCY) | CO-FOUNDER | [greyadv.com](#)

Nov 2015 – Dec 2016 | Calgary, AB

Reached out to 1000+ SMBs with 4 email campaigns. Bid for 10+ projects, awarded 4 and executed across multiple roles. Provided [web dev workshop](#) to first-time founders. Projects: Okotoks Farmers Market, Stable Legs, PetroRecruit.

SHELL CANADA | DRILLING ENGINEER

Sep 2014 – Feb 2017 | Calgary, AB

Technical design, project management and field operations supervision of 3 drilling projects spanning 30+ wells and \$100M in capital expenditure & implemented drilling benchmarking program across North America.

RELEVANT PRODUCT EXPERIENCE

GOOGLE DESIGN SPRINT FOR USER ONBOARDING – CANVASS

Co-led [Design Sprint](#) with Google Gradient Ventures to simplify how manufacturers use data for forecasting. Facilitated problem definition, “Ask-the-Expert” interviews, idea generation, solution selection, mockup design in Figma, and testing with 6 real users.

DATA PLATFORM AND SERVICES PORTAL – UNSIST

Interviewed 10+ potential users, iterated on wireframes, mockups and MVPs, deployed [Energy Data Platform](#) and [Unsist Computing](#), improving the product based on usage.
